ITEM	S	U																																																																											
1. EQUIPMENT EXAM <i>(Oral) (Written)</i>																																																																													
2. PREFLIGHT CHECK OF AIRCRAFT																																																																													
3. COMPUTATION OF FUEL LOAD & FUEL LOADING																																																																													
4. COMPLETION OF COMPANY APPROVED FORMS																																																																													
5. STARTING, TAXI, AND RUNUP																																																																													
6. POWERPLANT AND PROPELLER CONTROL																																																																													
7. CRUISE CONTROL AND COMPUTATIONS																																																																													
8. AIRCRAFT/POWERPLANT OPERATION ANALYSIS																																																																													
9. FUEL SYSTEM MANAGEMENT																																																																													
10. AIR CONDITION & PRESSURIZATION CONTROL																																																																													
11. ELECTRICAL SYSTEM OPERATION																																																																													
12. POWERPLANT FIRE CONTROL																																																																													
13. EMERGENCY GEAR AND FLAP EXTENSION																																																																													
14. HEATER FIRE AND CARGO COMPARTMENT FIRE																																																																													
15. SMOKE EVACUATION																																																																													
16. EMERGENCY DEPRESSURIZATION																																																																													
17. FUEL DUMPING PROCEDURE																																																																													
18. POWERPLANT SHUTDOWN AND RESTART																																																																													
19. DEICING AND ANTI-ICING																																																																													
20. LOCATION AND USE OF EMERGENCY EQUIPMENT																																																																													
21. EMERGENCIES-HYDRAULIC, PRESSURIZATION, ETC.																																																																													
22. CREW COORDINATION AND MONITORING																																																																													
REMARKS																																																																													
PREFLIGHT																																																																													
1. EQUIPMENT EXAMINATION <i>(Oral or written)</i>																																																																													
2. * PREFLIGHT INSPECTION																																																																													
3. TAXIING																																																																													
4. POWERPLANT CHECKS																																																																													
TAKEOFFS																																																																													
5. NORMAL																																																																													
6. INSTRUMENT																																																																													
7. CROSSWIND																																																																													
8. WITH SIMULATED POWERPLANT FAILURE																																																																													
9. * REJECTED TAKEOFF																																																																													
INSTRUMENT PROCEDURES																																																																													
10. * AREA DEPARTURE																																																																													
11. * HOLDING																																																																													
12. * AREA ARRIVAL																																																																													
13. ILS APPROACHES																																																																													
14. OTHER INSTRUMENT APPROACHES																																																																													
15. CIRCLING APPROACHES																																																																													
16. MISSED APPROACHES																																																																													
INFLIGHT MANEUVERS																																																																													
17. * STEEP TURNS																																																																													
18. * APPROACHES TO STALLS																																																																													
19. * SPECIFIC FLIGHT CHARACTERISTICS																																																																													
20. POWERPLANT FAILURE																																																																													
LANDINGS																																																																													
21. NORMAL																																																																													
22. FROM AN ILS																																																																													
23. CROSSWIND																																																																													
24. WITH SIMULATED POWERPLANT(S) FAILURE																																																																													
25. REJECTED LANDING																																																																													
26. FROM CIRCLING APPROACH																																																																													
27. NORMAL AND ABNORMAL PROCEDURES																																																																													
28. EMERGENCY PROCEDURES																																																																													
29. JUDGEMENT																																																																													
30. HOVERING MANEUVERS																																																																													
31. RAPID DECELERATIONS <i>(Quick stops)</i>																																																																													
32. AUTOROTATIONS <i>(Single engine helo. only)</i>																																																																													
Items that may be waived are indicated by an asterisk (*) See Appendix F to FAR 121. All applicable items must be graded S, U or W.																																																																													
RESULT OF CHECK		APPROVED	CHECK AIRMAN'S PERFORMANCE		SATISFACTORY																																																																								
		DISAPPROVED			UNSATISFACTORY																																																																								
REGION		DISTRICT OFFICE		INSPECTOR'S SIGNATURE
